## WORK EXPERIENCE

### Junior Software Engineer

Comfisoft India, Indore(M.P.)

04/2019 - 05/2020

*Achievements/Tasks*

- Developed code for connecting front-end designs to back-end using PHP.
- Worked on APIs for different modules like invoices, csv files etc.
- Worked on Invoices and car modules.

### PHP Developer

Mastermind E-Solutions, Indore(M.P.)

10/2018 - 04/2019

*Achievements/Tasks*

- Created few pages for existed websites and worked on for 5-6 months.
- Did Form validations like email, password, empty field check, duplicate values check.
- Created APIs for different application and also check using Postman.

## CERTIFICATES

PHP with MYSQL (08/2018 - 10/2018)

C++ through C (09/2015 - 12/2015)

## PERSONAL PROJECTS

**1.User Information System** (Python/Django/HTML/CSS/Bootstrap/python library as pillow etc) (09/2020 - 09/2020)

- User Registration- Insert HTML form's data into MySQL Database with image uploading functionality.
- Login- User can login with username/email and then only can get record.
- For deletion set status into DB from 0 to 1 and display data with status 1. In this way user will not get record but it will be there in DB for backup in future.

**2.Tour and Travels** (Python/Django/HTML/CSS/Bootstrap/Python library like pillow etc.) (08/2020 - 08/2020)

- Used Bootstrap free template for user interface and converted it dynamic.
- Added few extra functionalities like traveler's registration, login and logout.
- Restrict users to see the travelers list without login & redirect into login page.
- Fetches and shows destination places dynamically from the database and many more functionalities.

## EDUCATION

**Bachelor of Engineering**(Computer Science & Engineering) with **8.17 GPA**  
**Technocrats Institute of Technology, Bhopal (M.P.)** (06/2014 - 05/2018)
